PROFESSIONAL SUMMARY

Supply chain operations lead with 7 years of experience across international logistics, fintech and U.S. healthcare operations. I design how processes, people, data and tools work together, and I stay through implementation. At ACS Cargo I own the end-to-end U.S.-Costa Rica import operation (75,000+ kg and 60,000+ packages a month) and designed the payroll rules engine, the WhatsApp Business service flows and the management dashboards it runs on. As Scrum Master on a payments platform, I worked between business and engineering across three teams: requirements, prioritization and delivery. Bilingual (Spanish native, English C1); Industrial Engineering student, expected 2027.

CORE COMPETENCIES

Business Analysis | Requirements Gathering | Process Mapping & Redesign | Functional Solution Design | Stakeholder Management | Change Management & Adoption | Project Management | Scrum & Kanban | KPI & Dashboard Design | End-to-End Supply Chain Operations | Customs Clearance & Last Mile | AI-Assisted Automation | SOPs & Process Documentation

PROFESSIONAL EXPERIENCE

Operations & Supply Chain Lead | ACS Cargo CR LLC / ACS Logística Internacional 2024 - Present

International courier operating the U.S.-Costa Rica trade lane, with its own warehouse in Miami.

- Own the end-to-end import flow, from the Miami warehouse through customs clearance to last-mile delivery, coordinating Miami HQ, carriers and customs brokers for 75,000+ kg and 60,000+ packages a month.
- Designed the payroll rules engine (overtime thresholds per biweekly cycle and per week, for full-time and part-time schemes) and specified the tool that replaced manual calculation.
- Designed WhatsApp Business automated flows for ~150 daily client conversations, taking repetitive messaging off the team so it can focus on the cases that need a person.
- Designed the operation's management dashboards and KPI trackers (Excel, Google Sheets, Notion) for volumes, costs, payment calendars and service levels, with one daily view across three workstreams: chatbot clients, wholesale accounts and Miami HQ coordination.
- Lead a 5-person customer service and delivery coordination team; turn recurring issues into SOPs, templates and escalation playbooks, including cases under Costa Rica's consumer-protection law (Ley 7472, MEIC).
- Designed a multichannel liquidation campaign (WhatsApp, Instagram, Marketplace) to turn customs-return inventory into revenue.

Scrum Master / Project Manager | Marketsource SRL 2023 - 2024

Fintech: financial infrastructure and payment-processing platform.

- Scrum Master and project manager for three teams (~15 people): the platform's backend team, a second team coordinated through the DevOps department, and the business intelligence team I led directly.
- Worked between business and engineering: gathered requirements from stakeholders, turned competing priorities into backlog decisions and coordinated delivery.
- Implemented Agile ceremonies and tracking in Jira and Confluence, improving team efficiency by 95%.

Preauthorizations & Admitting Specialist | UCB Inc. (servicing Cleveland Clinic Florida) 2021 - 2023

Remote U.S. healthcare operations role, fully in English.

- Managed insurance preauthorizations and patient admissions for Cleveland Clinic Florida in a HIPAA-governed environment with strict SLA and accuracy standards.
- Worked daily with U.S. insurers, clinical teams and patient services to resolve denials and secure approvals on deadline; exceeded individual case quotas and earned performance bonuses.

Customer Service Representative | Farmacia Nuestra Señora (retail) 2019 - 2021

- Front-line service in a high-traffic retail pharmacy: transactions, product inquiries and complaint resolution.

EDUCATION

B.S. in Industrial Engineering Universidad Castro Carazo	In progress, expected 2027
<i>Emphasis in Supply Chain Management and Process Management</i>	
Master's program in Project Management / Systems Design	Under evaluation
B.A. in Philosophy & Humanities Universidad Católica de Costa Rica	2014 - 2017
Leadership, Ethics & Communication Formation Seminario Nacional de Costa Rica	2013 - 2019

CERTIFICATIONS

- Scrum Master, International Scrum Institute
- Google Project Management Professional Certificate
- Google Business Intelligence Professional Certificate

TOOLS

Jira | Confluence | Notion | Asana | Trello | Miro | Slack | Advanced Excel | Google Workspace | Power BI and SQL (fundamentals) | SAP (end user) | WhatsApp Business automation | AI tools for analysis, documentation and reporting
