PROFESSIONAL SUMMARY

Project manager and certified Scrum Master with 7+ years of professional experience (since 2019) across U.S. healthcare operations, fintech, and high-volume international logistics, including 3+ years leading projects and delivery teams. Led 3 Agile teams (~15 people) delivering a financial infrastructure and payment processing platform, and currently directs operations for a U.S.-Costa Rica courier moving 75,000+ kg monthly (up from ~28,000 kg in 2024 with the same team), running its process-improvement projects end to end: diagnosis, business case, requirements, implementation, and adoption. Recognized for critical thinking applied to process diagnosis and business case development, stakeholder conflict resolution, and AI-assisted automation that removes manual work from operations. Adaptable across industries, regulatory environments, and distributed teams; bilingual (Spanish native / English C1) with end-to-end experience serving U.S.-based stakeholders.

CORE COMPETENCIES

Project Planning & Control | Agile, Scrum & Kanban | Risk & Dependency Management | Stakeholder Management | Business Analysis | Requirements Gathering | Business Case Development | Change Management & User Adoption | Process Improvement (Lean / Six Sigma) | Procurement & Vendor Management | KPI Definition & Data-Driven Decision Making | AI-Assisted Workflow Automation | Conflict Resolution & Negotiation | Critical Thinking & Problem Diagnosis | Cross-Functional Team Leadership | Adaptability in Cross-Cultural, Distributed Teams | Bilingual EN/ES Communication

PROFESSIONAL EXPERIENCE

Operations & Supply Chain Lead ACS Cargo CR LLC / ACS Logística Internacional <i>International courier operating the U.S.-Costa Rica trade lane.</i>	Feb 2024 - Present
- Lead end-to-end operations and process improvement for a courier handling 75,000+ kg and 60,000+ packages monthly, owning KPI tracking, service-level performance, and continuous improvement across customs clearance, last-mile, and escalation workflows. - Manage and mentor a 5-person cross-functional team spanning customer service, customs, and delivery, resolving escalated client disputes and inter-area conflicts to protect service levels under pressure. - Own stakeholder coordination with carriers, customs brokers, and regulators under Costa Rica's Ley 7472 (MEIC) consumer protection framework, ensuring operational compliance. - Apply Lean and Six Sigma principles to diagnose bottlenecks and deploy continuous improvement initiatives, enabling the team to absorb volume growth from ~28,000 kg to 75,000+ kg per month without additional headcount. - Handle U.S. account administration, supplier payments and vendor management, and procurement as buyer. Improvement projects, owned from diagnosis and business case through implementation and team adoption: Payroll control (Jun 2025 - Present). Problem: payroll for 8–10 ACS Cargo Miami employees, with overtime on an 80-hour biweekly threshold (full-time) and a weekly threshold (part-time), was calculated by hand, with 1–5 errors per cycle. Mapped the end-to-end process, quantified its cost, built the business case for leadership, defined the functional requirements, and directed implementation through full adoption. Result: overtime handling went from 45–60 to 20–35 hours per cycle and errors from 1–5 to 0–1, with labor-hour peaks now visible to support staffing decisions. Delivery coordination (Feb 2024 - Mar 2025). Diagnosed the root causes of delivery errors, mapped the inefficiency points across the delivery flow, defined the client re-coordination and route-tracking process, and handed the improvements to the in-house development team as requirements for the company's system. WhatsApp Business bot flows. Problem: start-of-day peaks of 200–300 client messages had to be triaged by hand. Designed and deployed AI-assisted bot flows across 150+ daily client touchpoints that absorb the surge and classify each client by type. Result: the morning backlog needing manual triage dropped from 200–300 to 50–80 messages, and each client now reaches the team with a clear handling path.	
Scrum Master / Project Manager Marketsource SRL <i>Fintech - financial infrastructure and payment processing platform development.</i>	Feb 2023 - Feb 2024
Served as Scrum Master for 3 cross-functional teams (~15 people) building a payment processing platform: the backend team, a second team coordinated through DevOps, and a business intelligence team under direct leadership. Owned the full ceremony cadence: backlog refinement, sprint planning, daily stand-ups, sprint reviews, retrospectives, and release planning.	

- Tracked milestones, risks, and cross-team dependencies in Jira and Confluence, including work routed through DevOps, across releases that improved response times in the platform's financial management.
- Mediated competing priorities between technical and business stakeholders by converting subjective debates into data-driven backlog decisions, eliminating recurring prioritization conflicts.
- Introduced Agile metrics (velocity, burndown, cycle time) and Kanban WIP limits; over six months, team velocity improved by 95%.
- Coached engineers and product stakeholders on Agile practices, conflict resolution, and collaborative work patterns, strengthening the communication line between the Product Owner and delivery teams.
- Tooling: Jira, Confluence, Slack.

Preauthorizations & Admitting Specialist | UCB Inc. (servicing Cleveland Clinic Florida)

Dec 2021 - Feb 2023

Remote U.S. healthcare operations role, fully English-language.

- Processed high-volume insurance preauthorization cases for Cleveland Clinic Florida, consistently exceeding individual case quotas and qualifying for performance bonuses.
- Coordinated daily with U.S. insurance carriers, clinical teams, and patient services to secure timely admissions approvals, navigating payer requirements and resolving denials and coverage disputes.
- Operated 100% remotely in a HIPAA-governed, compliance-driven environment with strict SLA and accuracy standards aligned to Cleveland Clinic quality benchmarks.

Customer Service Representative | Farmacia Nuestra Señora (retail pharmacy)

Sep 2019 - Nov 2021

- Front-line service in a high-traffic retail pharmacy: transactions, product inquiries, and complaint resolution with de-escalation of customer conflicts.

EDUCATION

B.S. in Industrial Engineering - Universidad Castro Carazo | In progress (expected 2027)

B.A. in Philosophy & Humanities - Universidad Católica de Costa Rica | 2014 - 2017

Leadership, Ethics & Communication Formation - Seminario Nacional de Costa Rica | 2013 - 2019

Total full-time education completed: 15+ years.

CERTIFICATIONS

- Scrum Master - International Scrum Institute
- Google Project Management Professional Certificate
- Google Business Intelligence Professional Certificate

TOOLS & TECHNICAL SKILLS

Project & collaboration: Jira and Confluence (sprint tracking, backlog, documentation) | Trello | Asana | Notion | Miro | Slack

Data & reporting: Microsoft Office Suite (advanced Excel) | Google Sheets | Power BI and SQL (fundamentals)

Business systems: SAP (end user) | ACS proprietary CRM (in-house) | WhatsApp Business (bot flows) | Google Workspace

AI: Claude, ChatGPT, and Gemini (operational documentation, data analysis, management reporting)

LANGUAGES

Spanish (Native) | English (C1 - Advanced, professional fluency) | Portuguese (B1) | Italian (A2) | French (A1)
